

Looking for Ways to Reduce Your Heat Rate – and Fuel Costs?

Welcome to your Heat Rate Reduction Kit

With fuel accounting for as much as 80% of production costs, power companies are on the hot seat to identify energy efficiency solutions. The level control experts at Magnetrol can help you manage controllable losses through effective, accurate feedwater heater level control that may save you significant fuel expenditures.

Download our Heat Rate Reduction Kit to learn how we can help reduce your heat rate – and drive down fuel costs. Just complete the form at the right to access the information that you need to implement an effective solution for your power plant.

Your Heat Rate Control Kit contains:

- “Heat Rate and Feedwater Heater Level Control” white paper
- “Managing Heat Rate and Controllable Losses” video
- “Next-Generation Level Instrumentation for Heat Rate Awareness and Control” Special Applications booklet
- “Reduce Your Heat Rate and Drive Down Fuel Costs” brochure
